KwikTag v3.6 Release Notes

The following Release notes cover the KwikTag core components as well as Office Doks, Kwikconnect and Transport components.

Installation Notes

See the Installation Guide for installation of KwikTag v3.6

Requirements

- ❑ Windows Server 2003 (32-bit) Service Pack 2
- ❑ SQL Server 2005 Standard (32-bit)
- ❑ SQL Server 2005 Service Pack 2
- ❑ Internet Information Services 6.0
- ❑ Internet Explorer 7.0
- ❑ Windows XP Professional, Vista Business
- ❑ Microsoft Office XP, Office 2003, Office 2007
- ❑ Microsoft.Net 2.0

Installations on 64-bit operating systems, SQL server clusters, Domain Controllers, and Microsoft Small Business Server are not supported. However 64-bit SQL server is supported if the SQL server is separate from any other KwikTag server.

Supported Document versions

New Features

Compatibility: Is now compatible with Microsoft Vista and Microsoft Office 2007

Improved Repository File Structure Management:
- KwikTag 3.6 brings changes to repository folder structure to ensure it remains fast and efficient as the repository volume increases. This was achieved by creating subsequent repository folders as volumes exceed the set capacity of a given folder. The new feature must be configured.

Increased Support for Large Drawers:
- Introduced paging to ensure drawers load quickly
  - o Set Documents per page: This allows the user to set the documents they want displayed per page. The minimum setting is 100 and the maximum setting is 30,000.
- Export, Reports and Drawer modification are also enhanced to support larger drawer volumes

Type Ahead New Icon Feature: This allows the user to select amongst a list of all previously indexed drawer values for a given field.

Enhanced document processing: By adding an exception handling folder, KwikTag will triage incoming documents and simultaneously continue processing standard documents.

KGS Drawer Search Modified: Is now on the primary drawer page.

Export Feature Improved: Export can now handle larger document volumes.

Resolved Issues History

Bug #129
Issue: When indexing documents that contained French characters an error message was generated.
Resolution: French characters are now accepted.

Bug #131
