KwikTag v4.5.2 - Release Notes

New Features:

Feature # JANPATCH-166: Administrative users can copy and modify the Connection templates.

Description: This feature will allow user to create a copy of the connection template. When a connection template is copied, a new editable version of connection template is created. User will be able to create a new connection for a site using this connection template.

Feature # EARLYYEAR-266: Administrative users can Import/Export a Connection template

Description:This feature will allow user to Import/Export the template. Importing a template will create a new version of base connection template from a valid xml file. Exporting a template will allow the user to export the selected template to an xml format.

Feature # JANPATCH-220: DeskTop Client is supported by Windows 7 operating system.
Description: User will be able to perform KwikTag Operations on Windows 7 operating system.

Feature # JANPATCH-220: Office Doks is supported by Windows 7 operating system.
Description: User will be able to tag documents using SendToKwikTag and PrintToKwikTag on Windows 7 operating system.

Feature # JANPATCH-220: KiwkTag for MS Dynamics GP is supported on Windows 7 operating system.
Description: User will be able to perform all the kwiktag operations in GP 9 and GP 10 clients installed on Windows 7 operating system.

Feature # JANPATCH-220: KwikTag for MS Dynamics Navision is supported by Windows 7 operating system.
Description: User will be able to perform all the kwiktag operations in NAV 5.0 SP1, NAV Classic 2009 and NAV Classic 2009 SP1 clients installed on Windows 7 operating system.

Feature # JANPATCH-414: SOP Intelliview is Supported in GP and NAV

Description: This feature allows user to view documents in Sales Order Processing cycle from Intelliview enabled screens.

To activate SOP feature
1. For existing connections created using v1.0 template, SOP feature will be enabled by re-applying the connection. This can be done by clicking on "Apply" button in connection property sheet.
2. For the new connections created using v1.0 template, SOP feature will be enabled by default.

Feature # JANPATCH-219: User should be able to perform all kwiktag operations on NAV Classic 2009 SP1 client.

Description: User will be able to perform all the kwiktag operations in NAV Classic 2009 SP1.

Resolved Issues History

Bug # JANPATCH-424

Issue: Admin - Unable to login as KwikTag administrator in Admin Console when KwikTag admins group is renamed to administrator.

Bug # JANPATCH-425

Issue: Admin - Editing a user when all Full CALs are used displays an error message.

Bug # JANPATCH-411

Issue: Admin - When multiple drawers are selected then the property sheet is empty.

Bug # JANPATCH-395

Issue: Desktop Client - Refresh button is not functional on Lost and Found Drawer.

Bug# 4544

Issue: OfficeDoKs - 'SendTo KwikTag' performed on multiple documents creates a single reservation.

Known Issues

Bug # RELIANTEX-366

Issue: Admin - Documents are not moved to destination site for drawers that have no user fields.

Bug # RELIANTEX-341

Issue: Admin - Message shown on the 'View Directory users' pop-up refers to "Group Synch" page rather than "Users" page.

Bug # RELIANTEX-340

Issue: Admin - 'Password' field in user general property sheet accepts a maximum of 16 characters whereas the 'Minimum Password Length' setting in Global settings page specifies the range as 1-999 characters.

Bug# RELIANTEX-356

Issue: Desktop Client - Incorrect message displayed, when user attempts to login using invalid password after 'Account Lockout Threshold' is exceeded.

Bug# RELIANTEX-342

Issue: OfficeDoKs - Once the 'Send To Path' is set for documents, there is no option to reset it to a drawer.

Bug# RELIANTEX-343

Issue: OfficeDoKs - Maximizing the Office Doks window, the controls are positioned to the left of the window without expanding.

Bug# RELIANTEX-357

Issue: OfficeDoKs - 'Next' button appears disabled when user returns to 'Select Drawer' window after navigating to 'Edit Kwiktag settings' page.

Bug RELIANTEX-359

Issue: Web Client - Navigating to 'Document Details' page from the Global Search page and then back to Global Search page, shows dual footer on the Global Search page.

Workaround: Click on the 'Search' button again which will show a single footer on the Global Search page.
