

## Document and Content Management In The Cloud

### Manage Your Documents In The Cloud

KwikTag document and content management in the cloud is flexible and powerful enough to manage any document-burdened process. It eliminates the out-of-control flood of email, paper, and electronic documents. KwikTag makes it easy to scan, upload, or drag-and-drop documents into a central repository-- and it's easier than ever for you!

Cloud-based document management means that your platform will be hosted, deployed, and managed by KwikTag. All of your data and documents will now be hosted and stored in the cloud, rather than in an on-site server that you maintain.

KwikTag document management in the cloud is now available for Microsoft Dynamics 365 Business Central, Dynamics 365 Finance, and Dynamics GP. It can also be implemented as a standalone solution.

#### Better Use of Resources

Save the time and money spent managing your in-house servers and hardware

#### No More Hassle

Allow IT staff to focus on high-priority work items instead of maintenance tasks

#### Scalability and Flexibility

Support and encourage business growth without costly changes to IT infrastructure

#### Data Backup

Gain peace of mind knowing business data is stored off-site, in secure data centers

### How KwikTag Works

KwikTag Cloud connects directly to your Dynamics ERP system to capture and retrieve documents and their transaction data. It is the only document management system that intelligently relates all documents in your process for complete, end-to-end visibility. The KwikTag platform supports any file type, such as PDF, Word, Excel, etc. KwikTag Cloud makes it easier than ever to access documents from anywhere, at any time.

## Key Features of KwikTag Cloud

### Collaboration

Information will now be accessible from anywhere, making it easier than ever to share information in real-time and allowing for increased team collaboration and efficiency.

### Speed of Access

Powerful ability to search, retrieve, and share documents in or out of KwikTag, based on search criteria, to simplify the hunt for document content or transaction field data.

### Modern Management

Central, secure document and content system with infrastructure and environment kept up to date with the latest software, features, and optimal user experience.

## KwikTag Cloud Integrations

### Dynamics 365 Business Central

KwikTag is directly integrated with more than 80 Dynamics 365 Business Central pages, allowing easy access to documents. Users do not have to leave the system to search or store related content.

### Dynamics 365 Finance

KwikTag is seamlessly integrated into more than 60 Dynamics 365 Finance pages, giving users unparalleled ability to attach, or "tag", and view documents directly from within Dynamics 365.

### Dynamics GP

KwikTag for GP is the only document management system that is directly integrated to more than 75 GP screens. Capture any document and find or share it from within GP or in KwikTag.
